General Patient Consent for Care Form

I, the undersigned, hereby consent to medical care and treatment, as ordered by a provider, while such medical care and treatment is provided through Dallas Pain Consultants on an outpatient / office visit basis. This consent includes my consent for all medical services rendered under the general or specific instructions of a provider, including treatment by a mid-level provider (Nurse Practitioner or Physician Assistant), and other health care providers or the designees under the direction of a physician, as deemed reasonable and necessary.

I agree and acknowledge that Dallas Pain Consultants is not liable for the actions or omissions of, or the instructions given by the physician/providers who treat me while I am a patient. I am aware that the practice of medicine is not an exact science and I acknowledge that no guarantees have been made to me as a result of treatments or examinations at Dallas Pain Consultants facilities.

Telemedicine

I understand that telemedicine (defined as the use of medical information exchanged from one site to another via electronic communications for the health of the patient, including consultative, diagnostic, and treatment service(s)) may be employed to facilitate my medical care. All electronic transmission of data will be restricted to authorized recipients in compliance with Federal Health Insurance Portability and Accountability Act (HIPAA) and applicable state privacy laws.

To the Patient:

You have the right to discuss the treatment plan with your physician/provider about the purpose, potential risks and benefits of any tests/procedures ordered for you. If you have any concerns regarding any test or treatment recommended by your health care provider, we encourage you to ask questions.

By signing below, you are indicating that (1) you intend that this consent is continuing in nature even after a specific diagnosis has been made and treatment recommended; and (2) you consent to treatment at this office or any other satellite office under common ownership. The consent will remain fully effective until it is revoked in writing. You have the right at any time to discontinue services.

Nurse Practitioner & Physician Assistant Consent

Here at, Dallas Pain Consultants, we strive to offer you high quality medical care and give strong consideration to your wait time. We employ Advanced Practice Registered Nurses, also known as Nurse Practitioners and/or Physician Assistants to assist us in carrying out your plan of care. Nurse Practitioners and Physician Assistants have received advanced education and training in the provision of health care. They are graduates of a certified training program and licensed by the Texas State Medical Board. They can diagnose, treat and monitor routine and complex pain disorders as well as provide health maintenance care. If you are seen by one of these providers, your doctor will review your care with them as part of your treatment plan. "Supervision" does not require the constant physical presence of the supervising physician, but rather, observing the activities of accepting responsibility for the medical services provided.

I have read the above and understand that in this practice a team approach is used with my unique needs presented and reviewed by one or more physicians in the development of my plan of care. I also understand that from time to time I may be seen by any or all of the providers in this practice, including the physicians, Nurse Practitioners and Physician Assistant.

I hereby consent to the services of a Nurse Practitioner or Physician Assistant for my healthcare needs. I understand that I can refuse to see the Nurse Practitioner or Physician Assistant and request to see a physician. I understand that this may require my appointment to be rescheduled.

Disclosure of Physician Interest & Ownership

To better serve you, our physicians, have ownership or financial interests in various other health care providers and/or facilities. Today's medical business climate is very complicated, and physicians have little negotiation power with insurance companies. Our physicians are committed to providing high quality health care services to our patients and may refer you to one of these providers and/or facilities to receive health care items or services that he has determined you need. Their ownership interest in these often provides them a voice in administrative, clinical and operational policies. This involvement helps ensure the highest level of patient care and customer service. During a physician/patient relationship you may be referred to a provider/facility or service. I am providing this information to help you make an informed decision about your health care. However, you have the right to choose your health care provider and you have the option to use a health care provider/facility/service other than the provider/facility/service to which you might be referred you. You will not be treated any differently if you choose to obtain health care from a provider/facility/service other than the provider/facility/service in which DPC Providers have an ownership or financial interest. If you require assistance, we will be happy to provide information about alternative providers/facilities/services. A list of these facilities/providers is available upon request.

If you have questions, please do not hesitate to ask. We welcome you as a patient & we value our relationship with you. By signing below, you acknowledge that you have read and understood this Disclosure, and that you
